

**SCHOOL OF ENGINEERING****DEPARTMENT OF CIVIL ENGINEERING****ACADEMIC VACANCIES**

Frederick University invites applications for a **Visiting Lecturer position in the following academic field:**

- Transportation and Highway Engineering

The position is available both for full-time and part-time engagement for a fixed-term contract of at least 1-year duration.

**For all the above vacancies applicants must hold:**

- A Doctoral degree relevant to a field listed above
- Related internationally recognised research work.
- Prior experience in teaching at university level is considered a strong advantage.

**The following would be considered as an advantage:**

- Proven track record of scientific publications and attracting external research funding for projects in the fields of transport systems planning, traffic engineering, pavement design and maintenance, or GIS applications in transportation and infrastructure management.
- Experience with interdisciplinary collaboration in areas such as smart mobility, urban planning, intelligent transportation systems (ITS), sustainable infrastructure, Geographic Information Systems (GIS) or geospatial data analysis.
- Ability to contribute to curriculum development and teaching in both undergraduate and graduate-level courses related to transportation engineering, highway design, traffic flow theory, transport policy and planning, and GIS for civil engineering applications.

Language of Instruction: **English**

Interested applicants must submit their applications electronically to [vacancies@frederick.ac.cy](mailto:vacancies@frederick.ac.cy).

Further information regarding the application procedure and qualification requirements for the various ranks can be found at our website – “[Explore career opportunities at Frederick University](#)”.

**The deadline for applications is August 22, 2025.**

**Successful candidates are expected to start employment in the Fall 2025 or Spring 2026 semester.**
