## SCHOOL OF ENGINEERING

### DEPARTMENT OF MECHANICAL ENGINEERING

#### **ACADEMIC VACANCY**

Frederick University invites applications for a **Visiting Lecturer position in one of the following academic fields:**

- Control Systems and Mechatronics, with emphasis on dynamic system modelling, sensing and actuation, and the integration of mechanical, electrical, and computational components for the design and control of intelligent systems.

The position is available both for full-time and part-time for a fixed-term engagement with a minimum of one year duration.

#### **For all the above vacancies applicants must hold:**

- A Doctoral degree relevant to a field listed above
- Related internationally recognised research work.
- Prior experience in teaching at university level is considered a strong advantage.

#### **The following would be considered as an advantage:**

- Applications of the above to the field of Automotive Engineering.
- Proven track record of scientific publications and attracting external research funding for research purposes.
- Experience with interdisciplinary collaboration in areas such as robotics, smart manufacturing, or energy systems.
- Ability to contribute to curriculum development and teaching in both undergraduate and graduate courses related to control systems, mechatronics, and automation.

Language of Instruction: **English**
