IT Systems Engineer - Job Advertisement

The Company

Frederick University is seeking to hire an IT Systems Engineer in Nicosia for full time employment.

Responsibilities

An excellent opportunity for an experienced and motivated IT professional to join part of the dynamic team of IT specialists to set-up and manage the University's IT systems, to support educational, administrative, and research operations. The successful candidate will report directly to the University's Director of Operations & Infrastructure Service.

- Set up and manage public-facing Linux servers, ensuring optimal performance, security, and reliability.
- Administer Microsoft Windows servers, Active Directory, Azure, Exchange, and utilize PowerShell for automation tasks.
- Oversee the administration of Moodle and Joomla platforms, ensuring smooth operations and addressing any issues promptly.
- Develop and implement Linux scripts to automate routine tasks and enhance system efficiency.
- Demonstrate hands-on experience in networking, including switching and routing using managed switches.
- Manage virtualization environments, with a focus on Proxmox, to ensure the stability and scalability of our infrastructure.
- Implement and maintain robust security measures across all relevant systems and platforms.

Profile of the Ideal Candidate

- University degree in Computer Science, Computer Engineering, Information Technology or a related field.
- Relevant certifications (i.e. MCSE, RHCE, VCP) will be considered an advantage.
- At least 3 years of solid experience in an IT Systems Engineer / System Administrator role, with similar responsibilities.
- Proven experience in setting up and managing public-facing Linux servers.
- Proven experience with networking, including switching and routing using managed switches.
- Background in virtualization, primarily with Proxmox technologies. Experience with other virtualization platforms (i.e. VMWare, KVM) will be considered an advantage.
- Proficient with Microsoft Windows servers, Active Directory, Azure, Exchange, and PowerShell.
- Experience in administering Moodle and Joomla platforms.
- Very good Linux scripting skills.

- Very good knowledge of security matters in all relevant areas, as well as cloud computing platforms and servers.
- Very good problem-solving and troubleshooting skills.
- Very good communication and collaboration skills.
- Detail-oriented, with a focus on delivering results.
- Very good knowledge of English and Greek.

Benefits

- A stable and professional working environment.
- Competitive remuneration package according to qualifications and experience.
- 13th Salary: In addition to the monthly salary, employees receive a 13th salary after one year of full-time employment.
- Provident Fund: Eligibility for participation in a provident fund after one year of full-time employment.
- 21 days of paid Annual Leave
- Paid Sick Leave
- Continuous learning and development opportunities.
- Supportive technical team and collaboration opportunities.

Application Details

Interested applicants should send their CV to vacancies@frederick.ac.cy with subject "IT Systems Engineer" no later than the 15th of April 2026. Please note that only successful candidates will be contacted.

All applications will be treated with the utmost confidentiality.

Frederick University is a Certified Good Practices Employer and encourages applications from all qualified individuals. We thank all applicants for their interest, but only those selected for an interview will be contacted.
