

INVITATION

The Department of Maritime Transport and Commerce and the Department of Architecture at Frederick University invite you to a public discussion on

Traffic Congestion and Beach Access: Challenges and Prospects for the coastal city of Limassol

Friday, November 7, 2025

17:30 – 20:00

Frederick University, Limassol

Room 306, 3rd floor

([18, Marios Agathaggelou str.](#), [Ayios Georgios Havouzas](#)).

Follow [this link](#) to register (RSVP by November 5, 2025)

The traffic congestion in Limassol leads to time wasted in the streets, pollution and stress that directly affect the quality of life of every citizen. At the same time, the limited and often commercialized access to the beaches deprives citizens of the right to freely enjoy the sea and causes new pressures on the city's road network. Citizens deserve better mobility, a healthy environment and truly free access to their city's coast; they deserve an inclusive city, which will offer better quality of life.

The discussion brings together representatives of relevant bodies, decision makers, experts and active citizens, with the aim to:

- present key issues and challenges,
- discuss alternative approaches,
- present projects that are already underway or planned, offering a comprehensive view of the solutions being developed.

AGENDA

17:30 – 18:30 | Part A: Traffic Congestion in Limassol

Panel moderator: Dr Angelos Menelaou,
Head of the Department of Maritime Transport and Commerce, Frederick University

Panel participants:
